Temperature Control Units  
Water & Oil

Cooling Technology has specialized in engineering and manufacturing CUSTOM DESIGNED high performance, high efficiency PROCESS COOLING EQUIPMENT for over 20 years. In turn, we have earned a reputation of ingenuity and quality in our workmanship in all aspect of our business. We provide expertise in our technical services for processors in the plastics, chemical, metal finishing, food, medical, pharmaceutical and other industries.

Compact Portable Chillers

Central Chillers

Cooling Technology custom designs, engineers, manufactures and provides installation and start-up services for heating & cooling auxiliary equipment. Our portfolio includes: Temperature Control Units, Hot Oil Units, Portable and Central Chillers, Open and Closed Loop Cooling Tower Systems, Fluid Coolers, Pump Tanks, Heat Exchangers, Water Filtration Systems and more.

Evaporative Cooled Systems

The cornerstone of our success is our FLEXIBILITY and attention to our customer's needs. Our sales engineers and expert design team take the time to understand your process and are ready to work with you to design the ideal process cooling solution for your unique environment. We can evaluate your system load characteristics as well as energy and climate related issues. Let us help you maximize on your return by evaluating existing as well as future system needs and recommending the BEST possible solution for you.
